

Certified Scrum Master® training

OUR CSM-TRAINING: “LEARNING WHAT IS HARD TO LEARN FROM BOOKS”

Scrum is a framework which is derived from practical experiences to enable us to master the most important challenges (increased complexity of products/projects, ambitious delivery targets etc.) in product development. Scrum is a frame and it needs to be filled, based on existing circumstances and ambitions of the project/environment. There is no single receipt for this venture, but you will be pointed towards some strategies to do so. The full potential of the framework grounds on continuous adaptation and optimization based on the build in feedback loops. You will not only learn about the Scrum framework and about the ScrumMaster role – what is essential, of course. Above that, you will really grasp the underlying principles which will enable you to see how Scrum could fit into your environment. The course is meant for people for whom Scrum is a relatively new topic or if you are interested to deepen your first practical Scrum Skills.

Who is the training for?

Anyone interested in starting a Scrum project or wishing to improve their current Scrum implementation. Naturally intended for those taking over the ScrumMaster role internally, it is equally useful for any Scrum team member to refresh or supplement own interests from daily business and come back with new insights and concrete improvement approaches.

What you will learn?

- Principles & intentions behind Scrum
- The essential core of the Scrum framework
- Scrum roles and responsibilities in a Scrum team
- How to plan for a multi-team, multi-sprint environment
- Common challenges when introducing Scrum to an organization

Your Trainer

Ralf Kruse is one of the most experienced Enterprises Agile Coaches in Northern Germany. He is a Certified Scrum Trainer® (CST®) and the only Certified Enterprise Coach® (CEC) of the Scrum Alliance in the Greater Hamburg area. From small start-ups in search of a better positioning within the scope of their growth to the accompaniment of holistic conversions in international corporations, Ralf Kruse has already successfully supported a large number of customers – both nationally and internationally.

The strength of Ralf Kruse is to give his many years of experience in the application of agile methods so that customers and trainers are able to become effective in their organizations immediately.
